

evelle

Evelle is a beauty concept that is developed in collaboration with leading researchers. For decades, scientists have worked on isolating those compounds that appear to be important for renewing skin cells, and it is this insight that is the cornerstone of Evelle.

Evelle contains a unique combination of revitalizing nutrients that influence and support the skin from within. Evelle is designed for those people who want to make the most of their natural beauty. The ingredients are based on one of the main principles of beauty care – influencing your looks from within. All ingredients have been carefully selected on behalf of their effect on skin, hair, and nails. With regular use of Evelle your looks have the optimal conditions.

A new generation of skincare remedies

Part of your daily skincare is represented by moisturizing and softening creams and lotions that are applied from the outside. They target the skin layers that are closed to the surface. If, however, you want to influence the deeper skin layers you must do it from the inside.

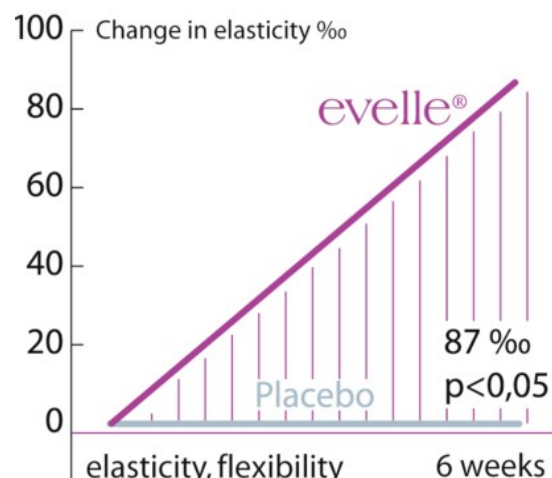

Evelle contains 10 active compounds that have all been selected because of their biological properties

- They support biological processes in the growth layers of the skin, helping to support the production of healthy skin
- They protect the skin cells and their membranes

- against the harmful impact of free radicals
- They counteract the negative impacts of air pollution, UV-radiation, and other factors that may damage your skin

Evelle contains plant extracts with bioactive isoflavonoids, natural carotenoids, collagen plus vitamins and minerals.

You can expect to see an effect after about 12 weeks of daily usage. It takes time to stimulate the biological processes involved in e.g. regulating the production of new skin cells, supporting the body's collagen synthesis, and stimulating the defense mechanisms that contribute to protecting skin cells.

Evelle

Nutrient content per recommended daily dosage:

		% RDA*
Vitamin C	60 mg	75%
Vitamin E	10 mg α -TE	83%
Biotin	160 μ g	320%
Zinc	7,5 mg	75%
Selenium (SelenoPrecise®)	50 μ g	91%

Collagen, Horsetail extract, Tomato extract, Blueberry extract, Extract of French maritime pine.

*ADT= Recommended Daily Allowance

Dosage

2 tablets daily with plenty of water.
Do not exceed the recommended daily dosage.
Should not be used by pregnant women or children under the age of 1 year without consulting a physician or health nurse first.

Important information

For optimal utilization: Take the tablets with a meal.

Content 60 tablets = 29 g

Ingredients

Tablet filler: Microcrystalline cellulose, Horsetail extract (Equisetum arvense L.), Tomato extract (Lycopersicon esculentum L.), **soy** lecithin, Vitamin: L-ascorbic acid, Mineral: Zinc gluconate, hydrolyzed **fish** collagen, Coating agent: hydroxypropyl methylcellulose, Mineral: Selenium-enriched **yeast** (SelenoPrecise®), Blueberry extract (Vaccinium myrtillus L), Vitamin: DL-alpha-tocopheryl acetate, D-alpha-tocopheryl succinate, Extract of bark from French maritime pine (Pinus pinaster) (Pycnogenol®), Coating agent: Talc, Dyes: Titanium dioxide, Lutein, Mixed carotenes, Anticaking agents: Silica, Magnesium salts of fatty acids, Flavoring agent: Vanillin, Vitamin: D-biotin.

*EP patent No. 1 478 732 B1.

Food supplements should not replace a varied diet.

Storage

Room temperature and not in direct sunlight. Keep out of reach of children.

Facts about the active ingredients in Evelle

Vitamin C

Vitamin C is a water-soluble vitamin that contributes to the protection of the body's cells against oxidative stress. It supports the body's collagen formation for the normal function of cartilage, skin and teeth.

Vitamin E

Vitamin E is a fat-soluble vitamin that protects the body's cells against oxidative stress.

Biotin

Biotin is a water-soluble B vitamin that is part of the body's normal energy-yielding metabolism. It contributes to the maintenance of normal skin and mucous membranes, just like it contributes to maintaining healthy hair.

Zinc

Zinc is an essential mineral with antioxidant properties. It participates in about 200 different enzyme functions in the body and contributes to maintaining healthy skin, hair, and nails. It also contributes to the body's normal DNA synthesis and has a role in the process of cell specialisation. Moreover, it is important for normal fatty acid and vitamin A metabolism.

Selenium

Selenium is an essential mineral and an antioxidant. It

contributes to protecting the body's cells against damage caused by oxidative stress. Selenium plays a role in the maintenance of hair and nails. Evelle contains the patented, Danish selenium yeast, SelenoPrecise.

Collagen

Evelle contains collagen derived from fish, preferably from the skin. It is hydrolyzed, meaning it is degraded to peptides, which enhances its effect. Collagen forms a vital structural part of cartilage, and skin.

Horsetail extract

The herb Horsetail is a rich source of organically bound silicon, an important trace element. The tissues that contain the largest concentrations of silicon are skin, connective tissue, tendons, and arteries. Horsetail contributes to the maintenance of skin, hair and nails.

Tomato extract

A rich and bioavailable source of lycopene, a plant pigment and carotenoid. Lycopene is related to beta-carotene. Lycopene is a bioavailable substance that belongs naturally in tissue and plasma in the human body.

Blueberry extract

Contains some highly active compounds such as a blue-colored coloring agent called anthocyanin and pterostilben.

French maritime pine extract (Pycnogenol®)

Pycnogenol works as an antioxidant, helping to maintain good health by protecting cells from oxidative damage.
